Ei, A Pharmaceutical Solutionworks™ Launches EnDev Laboratories™ and Joins the NC Research Campus

Kannapolis, NC- Ei, A Pharmaceutical Solutionworks™ announces the launch of EnDev Laboratories™. EnDev is a standalone, full service R&D provider that is located in a 10,000-square-foot laboratory with office space on the third floor of the David H. Murdock Core Laboratory Building on the NC Research Campus (NCRC) in Kannapolis, NC. EnDev will have access to advanced scientific capabilities offered through the David H. Murdock Research Institute (DHMRI) and also the ability to explore collaborations with researchers on campus that advance novel skincare technologies. The launch of EnDev Laboratories™, along with the move to NCRC, allows the company to enhance its scientific foundation for dermatological product development and add a significant skin biology research capability that includes early safety screening, drug delivery, and drug target engagement. EnDev combines remarkable speed, agility and responsiveness with years of experience and know how to provide best in class pharmaceutical development.

EnDev offers topical research and development services that include early formulation screening; formulation innovation and development; analytical method development and validation, process development and scale up; project management; clinical and registration batch manufacturing; and regulatory affairs support. All of this allows EnDev to bridge the gap between what is possible and what gets done. In addition to extensive development services, EnDev is fully integrated with Ei's commercial manufacturing capabilities offering a turnkey experience from early development through to commercial launch. EnDev fills the space between a vision or idea and a successful commercial launch.

Ei's Chief Scientific Officer, Charles W. Gray, Jr., PhD, commented: "The combination of the EnDev team's experience in topical product development, the addition of advanced skin biology applications, and our expansion to best in class facilities at the NC Research Campus will significantly accelerate our progress toward creating the premier dermatology development capability.

John Regan, CEO of Product Quest and Ei, added: "R&D represents a key area of investment for the growth of our company. We are excited to launch EnDev Laboratories and partner with the NC Research Campus to bring additional capabilities to our customers."

About Ei, A Pharmaceutical Solutionworks™

[Ei, A Pharmaceutical Solutionworks™](#), is a wholly-owned subsidiary of Product Quest Manufacturing, based in Daytona Beach, Florida. Ei develops and manufactures topical liquid, semi-solid and loose powder lines for pharmaceutical, over the counter and therapeutic skin care and animal health clients. The company operates 180,000 square feet of state-of-the-art manufacturing facilities in Kannapolis, NC, less than three miles from NC Research Campus. Ei offers a robust topical drug product development capability and turn-key project management including formulation development, package sourcing, testing, method development, validation, ICH stability programs, bulk manufacturing, filling and regulatory filing assistance. Ei represents over 50 customers with a strong concentration of multi-national, top-tier pharmaceutical and therapeutic skin care companies and other Fortune 100 companies. Ei is privately held and was founded in 1983.
